Family Health History

Please note any health problems that are present in the family (eg. Cancer, diabetes, heart conditions, respiratory conditions, scoliosis, gut issues, allergies, etc.)

Mother's Family: _____

Father's Family: _____

Siblings: _____

INFORMED CONSENT TO CHIROPRACTIC CARE

Chiropractic care is recognized as being an effective and safe method of care for many conditions. However, changes to the law now require all chiropractors to warn people of material risks.

As in all health care, there are some risks with chiropractic care. This includes, but is not limited to:

Your condition becoming worse;

- Disc injuries, rib fracture, sprains/strains (1 in 139,000 in the neck and 1 in 62,000 in the low back);
- Stroke or stroke like symptoms (1 in 5.85 million neck adjustments)
- Put in context, chiropractic has been shown to be 250 times safer than anti-inflammatory drugs and safer than driving a car.

Some people may experience some mild soreness for 24-48 hours after their adjustments, especially when their body is unwinding. This is a normal sign of change, as may occur after exercise or stretching.

Clinical experience consistently demonstrates **unexpected improvement** in people's life. One study indicated that 23% of people experience improvement in some other aspect of their health. Of individuals who experience such improvements:

- 26% experienced improvements in their respiratory system;
- 25% in their digestive system
- 14% circulatory system/heart;
- 14% eyes/vision.

Paediatric Chiropractic Care. I agree to the Chiropractors at the Umina Chiropractic Centre delivering chiropractic care to minors under my care at my instruction. I understand that these chiropractors are not paediatricians; but are qualified to manage chiropractic care in children. I am also aware that these same chiropractors are members of the Chiropractors Association of Australia and are registered health care practitioners under the AHPRA (Australian Health Practitioners Regulatory Authority). The practitioners maintain their competencies by continuing professional development.

Consent to Chiropractic Care. I do not expect the chiropractor to be able to anticipate or explain **all** the risks and complications. I wish to rely on the chiropractor to exercise his/her judgement during the course of procedures which he/she feels at the time, based upon the information known, is in my best interests.

I understand that the intent of chiropractic care is to assist me in achieving my fullest potential. I also understand that maintenance or wellness care does not rely on the presence of symptoms for its application and monitoring and I have, to the best of my knowledge, provided, the chiropractor with a complete and accurate health history. I have read the above consent. I have had the opportunity to discuss with the chiropractor the nature and purpose of chiropractic adjustments and other procedures as well as other concerns. I understand that results are not guaranteed. I intend this consent form to cover the entire course of my chiropractic care for this and any future presentation.

I hereby request and consent to chiropractic examinations, adjustments and other chiropractic procedures wherever the chiropractor determines necessary. By signing below I agree to chiropractic care.
